An information session is planned for Aug 5 at 3 p.m. at the Walker Fire Hall to assess interest for a possible Small Cities Development project in the city of Walker.

A pre-application proposal on the possible project will be presented by the Cass County Economic Development Corporation (EDC). The application is a combined effort between the city of Walker and the EDC

If the application moves forward, the project would provide funding for the rehabilitation of owner-occupied housing within the city of Walker and commercial buildings in Walker's downtown district. Interested potential applicants are encouraged to attend.
